

Change Your Future, Now! *Questions, Reflections & Answers*

CHANGE YOUR FUTURE, NOW!

New Book by Germain Decelles proposes Questions, Reflections & Answers to help young and old struggling with life changes for a better future.

Change is important. It matters a great deal to organizations and institutions, to the people who work in them, and to the people who are served by it. For our society to function effectively, we need authentic people who can encourage others to perform at their best and step up and lead themselves.

I wrote Change Your Future, Now! because I have a passion to see more people in all walks of life embrace change. I wanted to help people like you discover their potential, so they could help themselves to evolve in life and help the people around them.

Change Your Future, Now! enable you to take the ideas from the book and apply them to your personal development. This will enable you to become a more effective and authentic person, one who can evolve and change from within in order to realize a better future.

Personally, I did not have a distinctive reference text like this book to help me when I was young, so I made up my development plan as I went along, with the help of my father, employers, close friends, my wife, my son, and some important mentors along the way.

After searching for role models for many years, I learned that I could never become a great person by emulating someone else or by minimizing my shortcomings. If you are aiming to be like somebody else, you will be merely a copycat because you will think that is what people want you to do. You will never be a real person with that kind of thinking. However, you might be a real person, unpredictable by following, your passions.

Many self-help books offer a quick fix, or provide the reader with seven or more easy steps to follow. Unfortunately, in reality a person's development does not usually work that way, and one rarely becomes a great person simply by reading a book.

To realize your potential in life, you need a detailed development program that will enable you to shape your future. That is the purpose of *Change Your Future, Now!* - to help you to develop a clear and detailed program for your personal growth and happiness in life. I encourage you to have as many experiences early in life as you can. Do not sit back and wait for these experiences to come to you. Seek them out! Then after each experience, you should process it by going back to your development plan to see what changes you need to make and/or to determine the future experiences you should have.

I encourage you to be completely open and transparent as you look inside yourself and answer the very challenging and difficult questions posed as you reflect on what you should be in the future.

The book, targeting student, parent, worker, educator, retiree, shows that you are never too young or too old to change your future. It shows how to become great in any endeavor, whether it be in your career, with your family or in your community. Furthermore, it shows how to use the unique strengths you were born with and develop them to the fullest, while acknowledging and learning from your shortcomings.
